One round, from request to approval

Dashed stages are MVP+1: drawn here, not built. While no checker has claimed a request, the requester can cancel it and the designer can replace the file.

Grey card: done by the system
Dashed: MVP+1, not built
Diamond: decision
Checker 2 can also send back, with the same list

Rules: Checker 2 must be a different person than Checker 1 in the same round. A returning round goes to Unclaimed with the previous checker shown as a hint. Rules to confirm with the client: second check only before approval, and lead approval.

Home

Welcome to Proof Check

Checks packaging proofs against the product spec. The app highlights, people decide.

Unclaimed
New work waiting for a checker. Claim one and it opens.

My tasks
What you claimed, handed on, finished or requested.

Track all work
What everyone is working on, and the approved proofs.

+ New request
Start a check for a packaging piece.

How Proof Check works

1 Request
A requester creates a request for one packaging piece, with the spec Excel and a designer.
Requester

2 Proof upload
The designer (own team or partner) uploads the proof PDF in the app.
Designer

3 Automatic check
The app reads the proof, compares it with the spec and the last round. It only highlights.
System

4 Review
A checker claims it from Unclaimed and decides every finding. Any real error: send back. None: pass on.
Checker 1

5 4-eye check
A different checker confirms what was dismissed, then passes it to approval or sends it back.
Checker 2

6 Approval
The food-safety lead approves. A send-back starts a new round, which returns to Unclaimed.
Lead

Good to know
The app never approves anything: only people sign off. A field it cannot read is shown as "could not read", never as a pass. Every decision is saved with your name and time.

Try it with the demo files
All names and values are fictional. Download the spec Excel and the proofs: v1 with seeded errors, v2 with changes nobody asked for, v3 clean. Each proof also comes as a flat, image-only PDF. Switch person with "Working as" at the top.

Download demo files (.zip) | Reset demo data

Reset asks to confirm, then puts every request back to its starting state.

Mangós instant zabkása 400 g · Box CS-20931

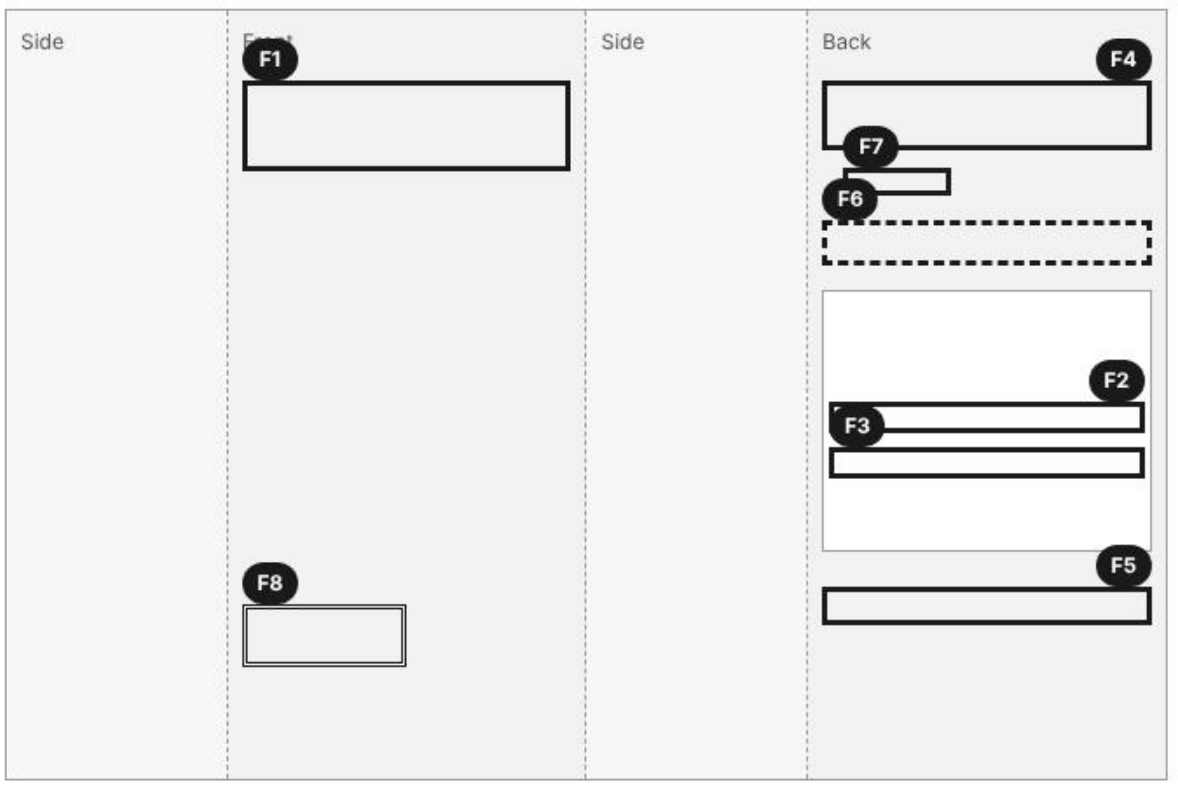

Round: Round 1 (latest)

WRK-0142 · requested by Partner (PO Nagy B.) · spec SP-2026-0417 v3 · font limit 1.2 mm x-height

Upload › Automatic check › **Checker 1 (you)** › Checker 2 › Approval

Automatic check finished. The proof has a text layer, so boxes and font sizes are shown.
Other states shown here: on a flat (image-only) proof there are no boxes and font size says Could not measure; below 100 dpi, numbers and units are marked Could not read. If the check failed, every field shows Could not read and a Run again button appears (only before you decide any finding).

+ Add finding | − | 100% | +

Stand-in for the proof image. Solid: found. Dashed: expected but missing. Double: added by a checker. Boxes need a text layer; on a flat proof findings are listed without boxes. To add a finding, describe it and optionally draw a box; it goes to the designer as a line and, with a box, as a mark.

Undecided 5 | All 8 | Matches 14

F1 **Product name** — Sárgabarackos, spec says Mangós — MISMATCH — Real error

F2 **Carbohydrate** — 46,5 g, spec says 64,5 g — MISMATCH — Undecided

Spec **64,5 g**
Proof **46,5 g**
Where Back, nutrition table

Proof crop
Back, nutrition table

Real error | Not an error

If not an error, pick a reason (optional note): Print sample OK | Spec outdated | Other

F3 **Salt** — 0,18 mg, spec says 0,18 g — MISMATCH — Undecided

F4 **Allergen emphasis** — Not an error: emphasis visible on print sample — NOT EMPHASISED

Not an error

F5 **Servings** — 10 portions, spec says 8 — MISMATCH — Real error

F6 **May contain** — Not found on the proof — MISSING — Undecided

F7 **Ingredients font size** — 1.05 mm, minimum 1.2 mm — TOO SMALL — Undecided

F8 **Claim added by Anna K.** — "Erősíti az immunrendszert!" needs legal check — CHECKER — Undecided

5 findings undecided: F2, F3, F6, F7, F8
When all are decided: any real error means Send back to designer, none means pass to Checker 2.

Finish review

WRK-0137 · Round 2 · 4-eye check

Upload › Automatic check › Checker 1 (Anna K.) ✓ › **4-eye check (you)** › Approval

Checker 1 found **no real errors** in this round. Your job: confirm that what was dismissed is really fine. 19 fields match, 4 of 4 requests are done, 0 unrequested changes.

Proof viewer, same as the review screen. Click a finding to see its box.

Dismissed by Checker 1 (3)

F4 **Allergen emphasis**
Emphasis not detected by the automatic check.
Anna K.: not an error. Reason: print sample shows it.
Agree | Disagree: real error

F7 **Ingredients font size**
Could not measure (flat PDF).
Anna K.: not an error. Reason: checked by hand, 1.4 mm.
Agree | Disagree: real error

F8 **Claim "Rostban gazdag"**
No spec field, added by Anna K.
Anna K.: not an error. Reason: legal approved on 2026-10-18.
Agree | Disagree: real error

Your decision
Disagreeing with any item turns it into a real error and opens the send-back list.

My tasks
Proofs to upload, fixes requested and your history.

How it works

1 You get a task
It shows the product, the spec and notes from the requester.

2 Upload your proof
Add the PDF and a short note. Keep the page at true size.

3 Wait for the review
The file is checked automatically, then reviewed. You can replace your file until a checker claims it.

4 Approved or sent back
If sent back you get one numbered list and marks on your proof.

5 Fix and upload again
A new round starts. Fix what is listed and say if you changed anything else.

B2 · DESIGN ONLY
Do not build. /not-built?screen=designer-tasks

Upload proof

Mangós instant zabkása 400 g · Box CS-20931 · WRK-0142 · due 2026-11-05

Round: Round 2 (latest): your upload — Older rounds open read-only with their requested changes and your file.

Your round 1 proof with the reviewers' marks

Numbers match the list below. Marks are read-only. Only requests the reviewers confirmed are shown, whether they came from a person or the automatic check.

Requested changes from round 1 (6)

1	A termék mangós, nem sárgabarackos. Kérjük a megnevezést a specifikáció szerint javítani.	Front panel, product name
2	Szénhidrát: a specifikáció szerint 64,5 g.	Back panel, nutrition table
3	Só: 0,18 g, nem mg.	Back panel, nutrition table
4	Az allergén TELJES TEJPOR nincs kiemelve.	Back panel, ingredients
5	A csomag 8 adagot tartalmaz, nem 10-et.	Back panel, servings
6	Hiányzik a keresztszennyeződési mondat.	Back panel, after ingredients

Marks appear where the proof had a text layer or a checker drew a box; on a flat proof you get the list only. Replying to a request is planned for the next version.

Materials

Spec (Excel), version 3 | Your round 1 proof

Proof PDF *
Drop the file here or browse
Small file is fine. Keep the page at true size so font sizes can be measured.

Note for the reviewers

Swapped the side panels to fit the new barcode position. Everything else as requested.

After you submit: the file is checked automatically, then reviewed. You can replace the file until a checker claims it. You get it back on your board as "Fix requested changes", or the request is closed.

Submit proof for review
